Introduction to Link 22

Abstract

The aim of this 2-day introductory course is to help students to rapidly develop a basic understanding of the Link 22 Tactical Data Link (TDL). The course covers the history and development of the system, technical characteristics and its likely future operational usage. Instructors will also illustrate the benefits and limitations of this TDL when compared to other Data Links in current or planned use.

Intended Audience

Engineers, Operators, Procurement Staff, Policy Advisors, Academics & Researchers
