Introduction to MIDS/Link 16

Abstract

The aim of the course is to help students to rapidly develop a basic understanding of the MIDS/Link 16 Tactical Data Link (TDL). The course covers the operational use of MIDS/Link 16 today as well as dispelling some of the myths surrounding the technology and the terminology used within the international community. Instructors also illustrate the benefits and limitations of this TDL when compared to other Data Links in current use.

Intended Audience

Government Engineers, System Developers, Operators, Integration Managers, Project Managers, Procurement Staff, Policy Advisors, Academics & Researchers

Subjects Covered

- History of MIDS/Link 16.
- MIDS/Link 16 terminology.
