Introduction to Link 11 Course

Abstract

The aim of this 2-day course is to assist students to develop an overall understanding and awareness of Link 11 Operations and to introduce them to the issues likely to be encountered by operators, engineers, procurers and policy makers. The course covers how this specific Tactical Data Link (TDL) is operated by specific land, sea and air platforms and how the Link 11 is used to contribute to the overall battle space tactical awareness capability. Instructors illustrate the benefits and limitations of this TDL and then highlight today's key challenges, backed up by a discussion of future developments.

Intended Audience

Government Engineers, Operators, Procurement Staff, Policy Advisors, Academics & Researchers, Industry Programme Managers, Developers and Engineers.

Subjects Covered
