Dynamic Systems Development Method (DSDM) Atern Awareness 11-12 Jan 2010

Abstract

Delivered in conjunction with our DSDM partner, KRC, the aim of the course is to increase awareness of DSDM Atern and give students a solid understanding of the DSDM Atern approach. It will enable them to understand how DSDM Atern can be applied in general and how it could benefit their own specific role on a project. Throughout the course all areas of DSDM Atern are explained and insights are given into how they work in practice, with particular emphasis on the techniques used. This course is of particular value to team members who are involved in a DSDM Atern project.

Intended Audience

Requirements managers/Project Managers/Team Leaders, Business Analysts, Solution Developers, Solution Testers, Quality Reviewers and Government Engineers.

Subjects Covered

- The Fundamentals of DSDM Atern.
- Benefits.
