# Introduction to Combat Identification

### **Abstract**

Combat Identification (Combat ID) is an essential part of modern warfare. The diversity of platforms and units operating in a rapidly changing battlespace make accurate identification of friendly and enemy forces critical, particularly with the ever present danger of fratricide and collateral damage.

This course provides an introduction to the key concepts of Combat ID as well as the elements and technologies involved in Combat ID in the current and future battlespace.

### **Intended Audience**

Combat ID is a topic that is crucial to the full range of professionals involved in military operations and support. The course has been crafted to ensure a greater understanding of Combat ID for those in the following roles:

Mission Commanders, Operators, Project Managers, Acquisition Specialists, Systems Engineers, Policymakers

### **Subjects to be covered:**

- What is Combat ID?
- Situational Awareness and Target Identification
- Tactics, Techniques and Procedures and operational effectiveness
- Human Factors
- Combat ID technologies
- Supporting technologies (Non Combat ID specific)
- Future directions for Combat ID technology
- Battlespace Management
- Joint and Coalition interoperability
- Case Studies
